Module **utilities**

▶ EXPAND SOURCE CODE

Functions

def **choose_sound_card_index**() -> int

Gets the sound card index for live audio from user input.

Returns:

The index of the chosen sound card (depends on the number of available sound cards).

▶ EXPAND SOURCE CODE

def **print_data**(data, flush=True)

Prints with [DATA] and cyan color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_data_alt_color**(data, flush=True)

Prints with [DATA] and magenta color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_dbg**(string, flush=True)

Prints with [DBG] and green color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_error**(string, flush=True)

Prints with [ERROR] and red color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_info**(string, flush=True)

Prints with [INFO] and blue color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_success**(string, flush=True)

Prints with [OK] and green color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

def **print_warning**(string, flush=True)

Prints with [WARNING] and yellow color signature.

Args:

`string` : String to print.

`flush` : Standard print's flush parameter.

▶ EXPAND SOURCE CODE

Classes

class **BColors**

Colors used to print and debug.
